EDUCATION

Noida International University

2024 – Present

Bachelor of Technology (B.Tech) — Computer Science | Currently: 4th Semester

CGPA: 8.89 | **Sem 4 SGPA:** 8.92

Relevant Coursework: Data Science, Data Analysis & Visualization, Data Structures & Algorithms, Discrete Mathematics, Introduction to AI/ML, Python Programming

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript, React Native (basic)

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, Streamlit, Transformers (HuggingFace), PyTorch

Tools & Platforms: GitHub, Jupyter Notebook, MongoDB

PROJECTS

Resume Dataset Analysis

Python · Pandas · NumPy · Matplotlib · Seaborn

- Performed end-to-end preprocessing and exploratory data analysis on a multi-resume dataset using Pandas and NumPy.
- Extracted meaningful insights for candidate classification, skill extraction, and profiling tasks.
- Built visualizations with Matplotlib and Seaborn to surface patterns across resume categories.

Dataset Analyzer — Streamlit Dashboard

Streamlit · Python · Plotly · Scikit-learn

- Developed a full-featured web dashboard supporting CSV/Excel uploads up to 100 MB for on-the-fly analysis.
- Implemented auto-cleaning pipeline covering missing values, duplicates, data-type optimization, and outlier detection.
- Delivered 6+ interactive chart types (histograms, box plots, heatmaps, scatter, pair plots, time series) with auto-generated insights.
- Enabled export of cleaned datasets as CSV or Excel for downstream use.

Hinglish Hate Speech Detector

Transformers · PyTorch · Scikit-learn · Pandas

- Fine-tuned MuRIL (Google's transformer pre-trained on 17 Indian languages) to detect hate speech in Hinglish — a Roman-script mix of Hindi and English.
- Addressed key challenges: inconsistent transliteration, mid-sentence code-switching, and Hindi-specific slang invisible to English-only models.
- Evaluated model performance with Scikit-learn metrics; visualized results with Matplotlib and Seaborn.

iKora — Mental Wellness Chatbot AI (Group Project)

AI · Chatbot · MongoDB

- Co-developed an AI-powered mental wellness chatbot to support users experiencing anxiety and mild depression.
- Integrated Bhagavad-Gita shloka references to deliver culturally resonant, calming responses.
- Presented at E-Cell Eureka innovation competition — secured 1st place; achieved Top 5 at the MongoDB college hackathon.

CERTIFICATIONS

IBM ICE Program — Artificial Intelligence & Machine Learning | IBM | Non-Technical Track

Data Analytics Job Simulation – Deloitte (via Forage) | Deloitte | covered data analysis, data modeling, data visualization, and forensic technology workflows

ACHIEVEMENTS

- 1st Place, E-Cell Eureka Innovation Competition — presented iKora mental wellness chatbot concept.
- Top 5 Team, MongoDB Hackathon (College Level) — contributed to full-stack AI chatbot development.
